## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by ***Van Den Berg et al (US Patent 7,270,078)***.

Van Den Berg et al teach a cowshed arrangement which is structurally similar to the Applicant's claimed cowshed arrangement. More specifically, the device includes at least one circular cowshed including a center area and a substantially concentric surrounding loafing area and at least one milking area is arranged radially outwardly of the loafing area, see Figures 3-5 and 13a.

### ***Election/Restriction***

The Applicant argues that species 15 and 16 have the same technical feature as species 1 is noted. However, species 1 is directed to a driving unit and species 15 and 16 are directed an automated cleaning device and an outward bedding spreader. These species are directed to different structurally elements and therefore are considered to be distinct and independent. Further, the Applicant did not state on the record that species 15 and 16 are obvious variants of species 1, and as such, the listed species are independent and distinct. Therefore, the election of species requirement is considered to be proper and final.

***Conclusion***

Summary: Claims 1-3 are rejected.
